

Introduction on how to make a video presentation using Zoom

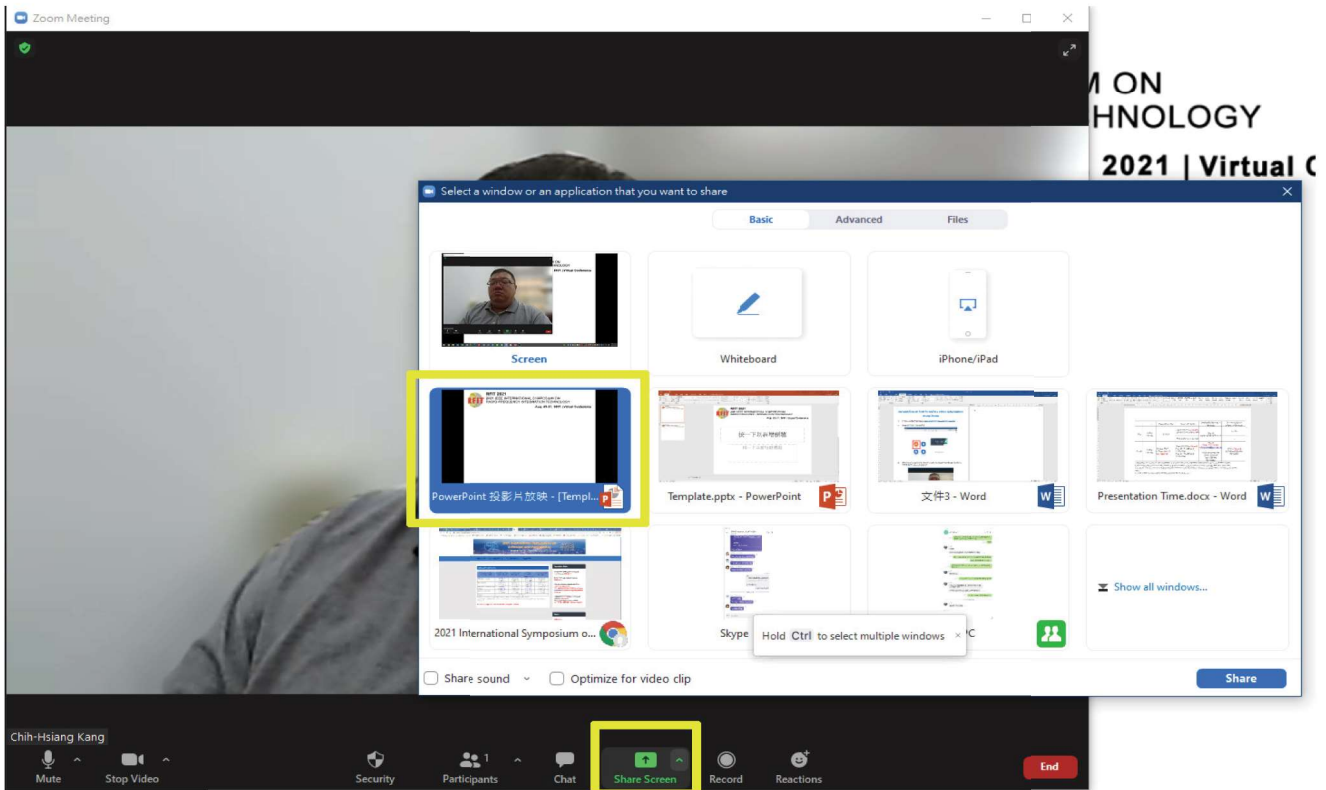

1. Down Zoom Meetings client at https://zoom.us/download#client_4meeting
2. Install and start a new meeting

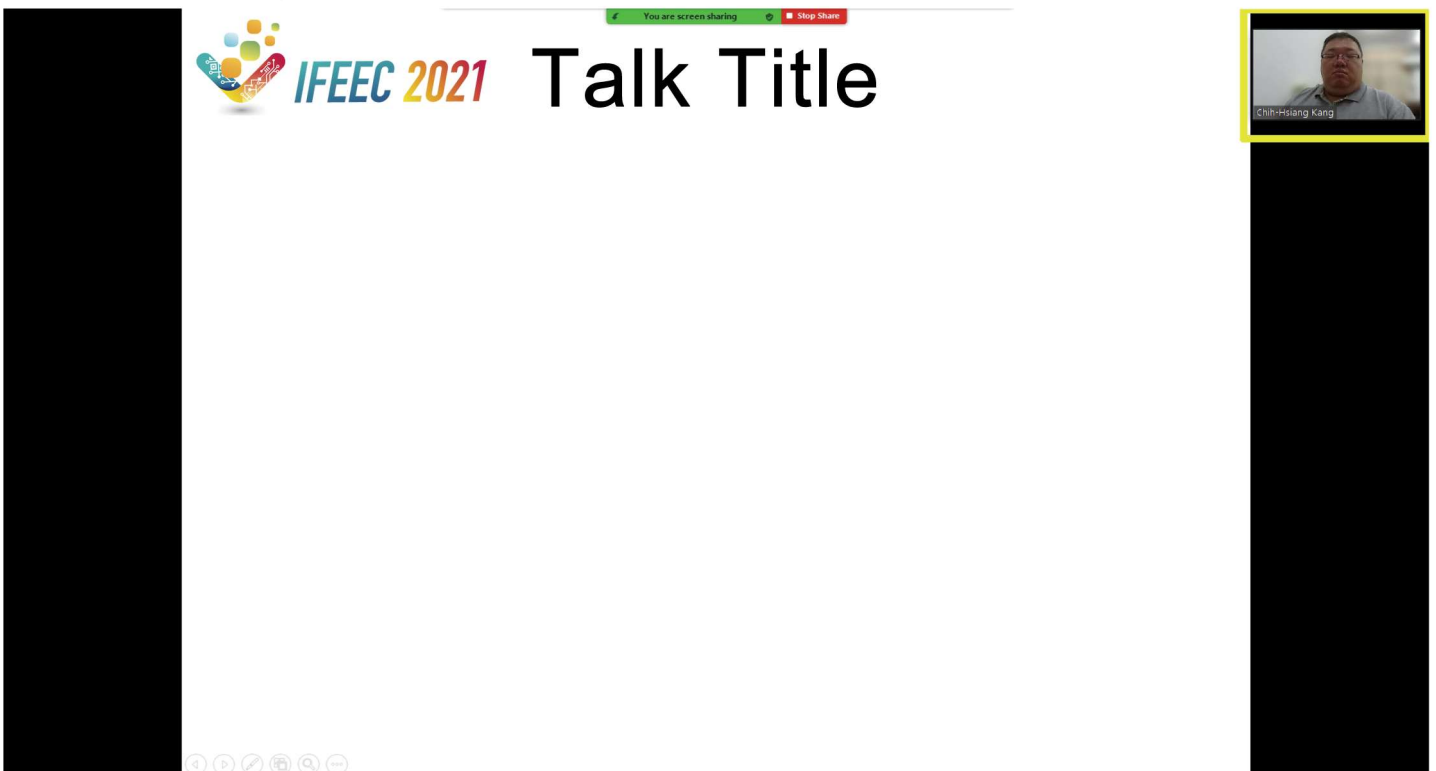

3. Make sure you microphone, camera is ready, also select virtual background if you wish to do so. (camera is optional)

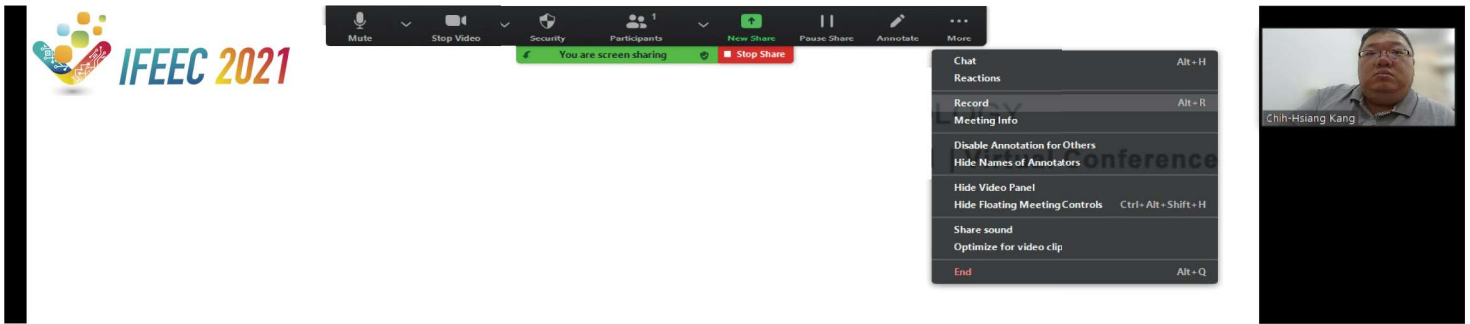

4. Click “share screen”, and select your presentation slides.

5. Make sure your camera is moved to a position that will not block what you wish to show us on your slides.

6. Click on record, there will be a notification tell you the record has started.

7. Start your presentation.
8. When your presentation is complete, click on “stop recording”
9. Close your meeting room, Zoom will start converting your presentation into a mp4 file.
10. Upload that mp4 file onto Whova.
